

**What is claimed is:**

1. A lighted image display, comprising
  - an image frame box, said image frame box comprising,
    - a front panel, said front panel comprising a transparent portion that is not imaged, and a lower opaque portion,
    - a rear panel that is spaced apart from said front panel, said rear panel comprising an image that is viewable through said transparent portion of said front panel,
    - an electrical light that is disposed between said front panel and said rear panel, wherein said electrical light is positioned between said lower opaque portion of said front panel and said rear panel, said below said transparent portion of said front panel, and
    - wherein said electrical light emits light that is reflected by said image and through said transparent portion of said front panel.
2. A lighted image display as described in Claim 1, wherein said image is a photograph, and wherein said photograph is positioned against said rear panel and between said rear panel and said front panel.
3. A lighted image display as described in Claim 1, wherein said transparent portion of said front panel comprises not less than 50% of the front surface area of said front panel.

4. A lighted image display as described in Claim 1, wherein said front panel and said rear panel are substantially parallel to each other.
5. A lighted image display as described in Claim 1, wherein said front panel and said rear panel are joined by four sides, and wherein at least a portion of an interior of said four sides comprises a reflective material.
6. A lighted image display as described in Claim 1, wherein said front panel is spaced apart from said rear panel by not less than 2.5 centimeters.
